AMATEUR RADIO CLUB

The Milwaukee School of Engineering Amateur Radio Club was organized to establish a nonprofit association of students, faculty, and alumni of MSOE for the promotion of mutual interest and fraternal goodwill among those interested in amateur radio, and to enhance good relations with the general public. The club also provides facilities for members of the School to obtain their "HAM" licenses.

The MSOE ARC, W9HHX, operates and maintains a well-equipped station which is capable of worldwide communications by SSB, CW, FM, or RTTY. For the novice, the Club has a Drake TR-3. The general position boasts a Drake R4B and T4XB plus a Collins 2 kilowatt (PEP) amplifier. The technician can operate a Drake ML-2 or a Drake TR-6.

The club participates in many activities. Contests are operated every year and Field Day is no exception. Meetings include business plus a movie or speaker. The club also passes all traffic originated here and is equipped to handle phone patches.

Membership is open to students, faculty and alumni of MSOE who have a genuine interest in amateur radio. Regular meetings are held on Friday of the first, fourth, seventh, and tenth weeks of the school quarter at 11:00 a.m. at the club station, Room C6A.

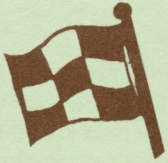

ASSOCIATION OF ARCHITECTURAL ENGINEERING STUDENTS

The Association of Architectural Engineering Students (AAES) is an organization which promotes interest, understanding, and better relations between its members and industry.

Active members are required to be enrolled in the Architectural and Building Construction Engineering Technology program with second term standing. All active members must maintain a 2.0 grade point average. Membership also includes inactive, honorary, and faculty members.

Meetings are held every other week and among the activities of the Association are guest speakers from industry, and movies, and various tours.

The student's participation in the Association and its activities enhances his perspective of the architectural engineering field and opens opportunities he may not have been aware of previously.

SPORTS CAR CLUB

The Milwaukee School of Engineering Sports Car Club is an organization beneficial to the student with an interest in automobiles and sports cars. The club is an active organization, sponsoring rallies, slaloms, movies, and lectures throughout the School year. Owning a sports car is not a requirement, because the meetings are usually devoted to discussion concerning new developments and concepts in racing and rallying. Racing movies are shown every other week and annual Ice Trials are held in February. If you are interested in the finer aspects in motoring, this club is for you.

STUDENT LIFE COUNCIL

The Student Life Council is an organization representing all of the clubs and fraternities at MSOE, as well as the residence hall floors. The SLC also elects students to be representatives to the Faculty Senate and the Alumni Association, and works in conjunction with the Office of Student Services.

The purpose of the SLC is to develop a unified spirit within the student body by providing lines of communication between the various organizations and dormitory floors, and the school. It also provides social activities for the students, and helps coordinate the efforts of the organizations. Meetings are held on Mondays of the even weeks in each quarter.

WSOE

The WSOE Radio Broadcasters Club is the official broadcast voice of the Milwaukee School of Engineering. The student operated radio station transmits throughout the residence halls as authorized under part 15 of the Federal Communications Commission's rules and regulations.

Aside from providing a medium of communication and entertainment for the student body of MSOE, the Club also presents an opportunity for members to gain knowledge of broadcast operations and assists students in obtaining commercial radio operator's licenses.

Membership is currently open to all students and faculty of MSOE who have an interest in broadcasting. Meetings are held every even week of the quarter on Thursday at 7:30 p.m. in the Harry Bradley Theater.
